## Large Crowd Assemble at Chinook For Jubilee Celebration

Parade and Program of Sports and Speeches

### LOCAL ITEMS

Mr. and Mrs. F. F. Tracy left on Thursday for Lacombe.

Chinook and District Agricultural Fair on Friday, August 5.

Mr. and Mrs. W. Steckle left on Saturday for Calgary en route for Edmonton, where Mr. Steckle will examine Grade VIII papers.

Mr. and Mrs. D. McKenzie and family left on Sunday for Granum where they will reside.

O. L. Mielke was a visitor in Calgary over the week-end.

Mrs. W. Lee and family left on Saturday for Kindersley en route for Meota Beach, where they will spend a vacation.

We received the new Mills Wire Weeder this week. Come and see this machine. We have lots of dry stove wood in stock. A car load of soft coal will arrive at the end of this week.—I. W. Deman, Chinook.

Mr. and Mrs. Jas. Rennie are spending a holiday at Calgary and Banff.

Robert Morrison was a visitor in Calgary this week.

A meeting of the directors of the Chinook Agricultural Society will be held at the home of W. A. Todd next Saturday evening, July 9, at 8 o'clock.

Mr. and Mrs. A. H. Clipsham and family left on Tuesday for Calgary, where they have purchased a home.

Miss Audrey Neff, who is attending High School in Calgary, is spending her summer holidays here with her parents.

W. A. Hurley is making arrangements to start up in business again in Chinook, and has purchased the Peyton building on Main street. Carpenters are busy this week making extensive alterations which will include a new front in the building and other attractive improvements.

Miss Alice Deman, who is now residing at Drumheller, spent the week-end at the home of her parents, Mr. and Mrs. I. W. Deman.

Mrs. K. L. Parks and children, of Sibbald, are visiting this week at the home of Mr. and Mrs. W. Milligan.

Miss E. Hughes, of Calgary, was a visitor in Chinook last week.

John Duncan and son, of Colborne, left on Wednesday morning for Red Deer, where they will attend the Nazarene Church camp meetings. Mrs. Duncan, who has been attending these meetings, returned on Monday.

Miss Marvel Milligan is spending a holiday at Meota Beach, Sask.

In ideal weather the largest crowd that has gathered in Chinook for years assembled last Friday for the Diamond Jubilee celebration. At noon the parade comprising decorated cars and floats was led by a drum band played by Deman Brothers. The Boy Scout's float "Rule Britannia" and a float representing the Chinook School were both decorated by W. E. Brownell who had spent much time in the preparation of these floats for the occasion. Others in the parade included Boy Scouts, C. G. I. T., School Children and a number of decorated cars.

Arriving at the School the children marched into the assembly hall where the crowd soon gathered, and a Patriotic Service was held consisting of speeches, songs and recitations.

L. S. Dawson acted as chairman. Flag Ceremony was led by C. W. Rideout, when after a salute to the Flag everyone joined in the singing of O Canada. Lorne Froude, M.L.A., gave a most interesting and instructive address giving a sketch of the history of Canada from 1763 when by the Treaty of Paris Canada was permanently ceded to Great Britain down to the present time. In his address he stressed the idea of the added prosperity that is the result of co-operation and a united Canada. The school children were kept alert and interested by his many questions. C. W. Rideout, representing the veterans, spoke of the wonderful resources of Canada and her progress in industry during the last sixty years. Robt. Smith read the messages from Lord Willingdon and Premier King, and the following items were given by the school children: Recitation, "Colours of our Flag," Norma Hurley; song, "The Maple Leaf"; reading by May Todd; piano solo, Marjorie Lee; recitation by Dorothy Carter; piano solo, Dorothy Neff.

After the morning program the school children were treated to free lemonade donated by J. L. Carter.

In the afternoon the crowd gathered on the fair grounds where a varied and interesting program of children's sports were held. A soft ball game was played by the men, and a baseball match between town and country men which resulted in a win for the former, the score being 11-10.

The main feature of the day and one which the children looked forward to was the grand fireworks display. The day was brought to a happy finish by a grand dance in the school which was enjoyed by a large crowd of people.

The various committees in charge of the day's celebrations are to be congratulated on the success of their efforts. Everything went off without a hitch due to the splendid management of the executive who were responsible for the day's program.

## The Red Cross appeals to YOU for support

SINCE the War, the Red Cross has disbursed over Seven Million Dollars for the Soldiers, Women, Children and Frontier Families of Canada.

About half of this has been spent for disabled soldiers—half in the other services of the Society about which you have been told. The Treasury is almost empty.

## \$1,000,000 Needed Now for Red Cross Work

The Red Cross brings cheer to our disabled warriors and their families. It stimulates the children of Canada to healthy living and good citizenship. It relieves suffering, and brings skilled attention to Canada's frontier districts remote from other aid. Its work is indispensable.

It now appeals to YOU, as a patriotic and humane Canadian citizen, to contribute generously to its need for funds.

Nation-Wide Appeal

## Canadian Red Cross Society

Send Contributions to:

## The Best in Meats

They have quality, they are tender, they are fresh, but not too fresh, they are properly prepared, they are out and sold in a cleanly manner, they are delicious, wholesome and pleasing to serve. Do you want a ROAST that will be juicy and tender when hot, that will slice up nicely when cold? VEAL, LAMB, BEEF PORK—the best of each. We know all about the meat we sell, and we won't sell it unless it's the best in the market.

Corned Beef, Smoked Fish and Meats, Cheese,  
Lard, Etc. Fresh Fish on Fridays.

## Chinook & Youngstown Meat Markets

**Safe** Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark registered in Canada of Bayer, Manufacturers of Monoclonal antibodies of Salicylic Acid (Aspirin) and "A. S. A." While it is well known that Aspirin means Bayer manufacture, to avoid the public being misled, the Bayer Company has placed with their product the name, "Bayer Cross".

## Outdoors

The editor of this column steps aside this week to give place to the following "Four Minute Essays" by Dr. Frank Crane, and to commend it to all readers as well worthy of adoption.

A good dose of Outdoors would cure almost anything. Quit wearing a hat and let your hair Outdoors, for that bald spot. Go barefoot, and your foot will slip back ten years. Take off your clothes and lie on the sand in the sun, acquire a rich tan, and you will become healthy as a savage. Go Outdoors and find a appetite. It's out there somewhere. Go Outdoors and get rid of Nerves. They live in the house. Other rats and mice that infest houses are Dyspepsia, Constipation, Liver Complaint, Peppiness and Insomnia.

Not only Bodily Allments, but all other kinds of plagues and misuses are house creatures. Creeds were all made in stuffy rooms. Religion, faith, hope, love, and courage inhabit the woods and meadows, sail the seas, and seek wind and sun.

Jesus taught Outdoors. Ecclesiastical Councils are held behind closed doors. The decline of religion is traceable from the Sermon on the Mount to the asphyxiating Meeting-House.

Education ought to be Outdoors. My favorite dream is the University of Outdoors, where pupils go shoeless and hunched and learn under the stars. This University would teach the child how to be as healthy as a pauper.

Where but Outdoors can you learn Botany, Geology, Astronomy, and the like. Real Science lives Outdoors, as much as Leap-Frog. Play Outdoors. Prisoners' Base is better than Whist.

Even kissing is better Outdoors. Copenhagen is much better for your general system than twirling on the parlor sofa. When you chase a girl half a mile to kiss her you realize what real kissing is.

Bathing is better Outdoors. A horse is healthier than a man because a horse has to walk after every life of grass he gets.

Outdoors is the solution of the Prison problem. From cell to sunshine means from the destruction to the reconstruction of the human waste-heap.

Jassane patients who are violent when locked up become peaceable Outdoors. Children thrive Outdoors and pine in the house.

Outdoors is cheap and plenty. God made Outdoors; man made Indoors. And God lives Outdoors; in man-made edifices—Indoors.

## New Device for Motor Cars

Electric Brake Will Use Less Current Than Horn

The near future may see the adoption of an electric brake system on passenger cars that will require the least energy on the part of the driver to stop the heaviest type of machine within a short distance. This type of brake is being manufactured for use on heavy trucks and trailers, and is being found more practicable than the mechanical type. The apparatus requires less electricity to operate all four brakes on a heavy passenger car than is needed to run one headlight or to blow the horn, once, it is said.

Whether the corn be of old or new growth, it must yield to Holloway's Corn Remover.

A button on the steering wheel, with which headlights can be dimmed, is said to lessen the risk of accident.

An electric shoe-polishing machine that shines both shoes automatically and in only three minutes, has been developed.

—is simply pure cow's milk from selected herds, preserved with granulated sugar after part of the natural water content of the milk has been taken away.

W. N. U. 1558

## Prince Favors Playgrounds

Glad to See Movement to Provide Place for Poorer Children  
The British National Playing Fields Association, which has issued an appeal for "£1,000,000 and many acres," states that there are in England 4,000,000 boys and girls who are without such facilities and that many great cities have not a single football field or cricket pitch for the use of the poorer youths. The King on his birthday placed two of the Royal park-docks at Hampton Court, containing about six acres, at the disposal of the Association. In the absence of the Duke of York, who is president, the Prince of Wales on his return from the Derby visited a broadcasting station and gave a wireless talk in support of the movement.

As a lover of games himself, the Prince said that he was really glad to see on foot a movement to provide proper playing fields for these 4,000,000 boys and girls and that he hoped soon to see the day when not one of them could say, "I have nowhere to play."

## Drives Out Rheumatism

### Subdues Lumbago

Brings Ease and Comfort to the Sufferer at Once

## NERVILINE

A King Over Pain

Those who seek permanent relief from the grinding pain of Rheumatism and Lumbago should read the letter of F. E. Normand, from Georgetown, who writes:

"I was fairly crippled with aching joints and Rheumatism. Nerviline must have been what I needed, because it cleared up my trouble quickly."

"If you need a reliable, strong, penetrating pain remedy, one you can depend on, get a 50c bottle of Nerviline today; it will make you well quickly."

## Arrangements for Dairy Convention

Inter-provincial Meeting Will Be Held 16 Days Next February

A convention in which the dairy interests of the four Western provinces will participate will be held in Regina at the Hotel Saskatchewan, February 7-16, 1928. This was decided by the board of directors of the Saskatchewan Dairy Association at its recent meeting. The Saskatchewan organization will be hosts to the inter-provincial gathering.

A general convention committee was appointed at the directors' meeting and convention arrangements are already under way. A feature of the gathering will be the number of outside speakers who will address the members and practical educational demonstrations.

A new idea is being introduced at the 1928 convention when prizes will be offered for the best judging by teams of three boys or girls in an inter-provincial competition in which all four western provinces will be represented. At one session addresses will be made to the convention by boys and girls under the age of 16.

## The First Economy

A young man proposed to a girl and was accepted. After their first tender transports were over they fell into serious talk.

"Now that we are engaged," said the girl, "we must begin to economize. Prudence is darling, that you don't do anything you can't afford."

The young man laughed grimly. "If I promised you that," he said, "I'd have to break off our engagement."

Mabel—You know George, you'd make a wonderful fireman.

George (surprised)—Why?

Mabel—Because you've always got your eyes on the bud.

## DYSENTERY WAS SO BAD BECAME ALARMED

Mrs. Wallace Pepper, R.N., No. 6, Sincere, Ont., writes: "Last summer I was very bad with dysentery. I lost my appetite and such severe pains in my abdomen they made me very faint. I passed blood which greatly alarmed me, so I hurried to the doctor to get the quickest way to get rid of it would be to take

"I took only part of a bottle and was completely relieved. I feel I cannot recommend it too highly."

This wonderful bowel complaint remedy has been on the market for the past 80 years; put up only by The T. M. Burko Co., Limited, Toronto, Ont.

## Plan to Shorten Voyage

Passengers Will Be Catapulted in Seaplanes From French Liner

Passengers soon will be catapulted in seaplanes from the deck of the French liner, latest addition to the French Line fleet to cut short the voyage across the Atlantic ocean. It is announced in a cable to the French Line. The cable came from the Ile de France, which was en route to the United States on her maiden voyage. The plans call for the seaplanes being shot from the liner off the Grand Banks where they will carry passengers to seaplane cities of the United States and Canada.

The seaplanes will not be added until the liner has made several trips.

At a depth of 66 feet the water of the Dead Sea is twice as salt as it is on the surface, and at 1,000 feet three times as salt.

Keep Minard's Liniment near at hand.

Clean to handle. Sold by all Druggists, Grocers and General Stores

## Manless Plow Is Simple

Automatic Machine Hailed as Revolution in Farming World

Apparently, the automatic plow, the tractor that works itself, is quite simple, much more so than preliminary notices said of it. A more detailed report says it is constructed of three pieces of wood, a few bolts, a spring, a piece of aluminum shaped like a large spoon. It was hailed at the Nebraska Agricultural College as a potential revolution in the farming world. It will enable the tiller of the soil to go to the cinema or drink cider or sleep while his fields are being plowed. It will soon be put on the market at a cost of a few dollars. It is the invention of F. L. Zychak of Grand Island, Neb.

To use this device, a farmer must first attach a plow to his tractor and cut a furrow around the outer rim of his field, making the corners rounded instead of square. Then he fastens Zychak's invention to the steering wheel of the tractor, outlining the spot where the furrow. He starts the tractor, climbs out. The tractor, guided along the furrow by Zychak's invention, continues to make shorter and shorter trips around the field, until it comes to a stop in the middle.

Tests of the device, it is declared, produced almost like clockwork. But when Zychak was first experimenting with a crude model, his neighbors warned him not to let the tractor get loose and destroy any of their property. Once he set the machine to plow all night. The neighbors came over at midnight and implored him to stop it.

## WEAK, LISTLESS GIRLS

Need Such a Tonic as Dr. Williams' Pink Pills to Restore Health

When a girl in her teens becomes pale and listless, especially if at the same time she shows inclination to tire easily, a listlessness and inattention to her work or studies, she needs Dr. Williams' Pink Pills, a tonic which directly and specifically corrects the condition from which she is suffering. A chemical analysis of the blood of such a girl would show it to be deficient in just the elements Dr. Williams' Pink Pills can supply. But an analysis of the blood is not needed—the physical signs are plain. Among these signs are a pallor of the cheeks and lips, dark circles under the eyes, easily tired and breathless after slight exertion, poor appetite, headaches, and sometimes fainting spells, follow after the patient is nervous and is started at the least noise. In all run-down conditions there is no other tonic will build you up so quickly and so surely as Dr. Williams' Pink Pills.

The statement of Miss Dorothy Lambdin, Bush Island, N.S., will bring home to others the weakness. She says: "I wish from my heart I could persuade every person who is in a run-down condition to give Dr. Williams' Pink Pills a trial. About a year ago I was a weak girl suffering from impoverished blood and run-down system, with many of the attendant symptoms. I had often read of Dr. Williams' Pink Pills and decided to take them, and after using six boxes I feel as well and strong as ever. Dr. Williams' Pink Pills will be my standby in the future. If ever my blood needs brightening up again, and I shall always find pleasure in recommending them to others."

You can get these pills from your druggist, or by mail at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

## Selling Deer Antlers

Reindeer have shed their antlers and native hunters at Nome, Alaska are busily gathering and transporting them to the coast for shipment to the south. The bone material is valuable for many articles of manufacture.

Japan's department of education sanctioned a plan to solicit fifty cents from each school child for the purchase of dolls to be sent to American children in return for their doll gifts to the Japanese.

Great Britain, Canada, France and Italy have paid bonuses to their world war veterans.

Are you acquainted with any man who flatters his wife?

If a man is out of his head he is apt to put his foot in it.

## Urge Vaccination to Prevent Tuberculosis

French Doctors Would Have New Vaccine Given to All Children

The success obtained by the use of the anti-tuberculous vaccine developed by Dr. Albert Calmette of the Pasteur Institute has led to a movement among French medical authorities in favor of the universal vaccination of children.

Results just tabulated up to the present year show that from 21,000 cases of vaccination with the Calmette vaccine, which is known as "B.C.G.," there have occurred only 1 per cent. of deaths from tuberculosis, while the tubercular mortality among unvaccinated children is shown by medical statistics to reach 25 per cent.

Professor Calmette explains that his vaccine does not inoculate the patient with the disease, but "augments" the disease and causes anti-tubercular bacilli to activity. This has been done through use of vaccine obtained through reducing the virulence of the tuberculous bacilli by the inbreeding of weakened bacilli until an innocuous vaccine is evolved which is only strong enough to suggest tuberculosis in the system.

Early experiments were made with laboratory animals, and then with monkeys, over a period of thirteen years before the scientists of Pasteur Institute felt sure enough of the harmlessness of the vaccine to test the effect upon man. The vaccine need not be injected, but may be administered in food.

Despite the apparent success of this vaccine, French doctors report a general hostility upon the part of the public to anti-tubercular vaccination, the same objections being advanced as those opposing vaccination for smallpox and typhoid. But an increasing number of physicians are becoming interested and the use of the vaccine has already spread to all countries of Europe.

## Boosting Poultry Congress

Official in U.S. Department of Agriculture Is Native-born Canadian

A native-born Canadian, who offered a wider opportunity for service in his chosen field than his own country was able to place before him, and who has made good, is Dr. Morley A. Jull, poultry husbandman in the United States department of agriculture.

It was with gratification that Canadian citizens, who are carrying out the work of organizing the World's Poultry congress of 1927, learned Dr. Jull had been chosen chairman of the United States national committee, for they knew both Dr. Jull and his accomplishments. As head of this important committee, Dr. Jull has been carrying on a splendid work, and his enthusiasm has already brought assurance of over two thousand official delegates from the United States, in addition to whom there will be several thousand other members and associate members of congress.

Dr. Jull is a native of Burford, Ont., where he was born on August 26, 1885. He is a graduate of Ontario Agricultural College, 1908 (B.S.A.); of McGill University in 1919 (M.Sc.); and of University of Wisconsin in 1922 (Ph.D.). In 1923-24 he was connected with West Virginia experiment station, and during the next two years was with the British Columbia Agriculture department. From 1912 to 1921 he was head of the poultry department of Macdonald college, when, at the request of the secretary of agriculture for the United States he entered the service of that country. He is an official delegate from the United States to the World's Poultry Congress to be held in Ottawa from July 27 to August 4.

## Russia Building Airplanes

Equipment of Soviets Increased by Sixty New Machines

An increase of more than sixty aeroplanes in the aerial forces of the Soviet union is announced as the result of a country-wide campaign conducted under the watchword, "Our answer to Chamberlain."

The reference to the breaking off of diplomatic relations with Russia by Great Britain.

Reports from 23 provincial cities published at Moscow announced the intention of the various unions in those places to construct from one to twelve aeroplanes each.

Leninburg leads in the building program.

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them healthy.

English scientists are experimenting with an electric machine designed to eliminate the dense fogs which visit London.

Minard's Liniment for warts and Pimples.

A teaspoonful of Gillett's Lye sprinkled in the Garbage Can prevents flies breeding

Use Gillett's Lye for all Cleaning and Disinfecting

## First Yokeless Egg

Adolph Goldberg is an egg candler; he has been one for 20 years. But not until the other day did he ever see an egg without a yolk. He took it to the Museum of Natural History, New York, where officials agreed that it was the first on record.

Dust Causes Asthma. Even a little speck of dust in the air will lead to asthma which no words can describe. The walls of the breathing tubes contract and it is difficult to breathe. From this condition Dr. J.D. Kellogg's Asthma Remedy brings the user to perfect rest. It relieves the spasms and normal breathing is firmly established again. Hundreds of testimonials received annually prove its effectiveness.

## Greatest Menace to Motorists

The two greatest menaces to the safety of motorists are the speed mania and the level crossing. When it is properly appreciated that roads are not race tracks and that level crossings are a species of death trap, the number of fatal accidents caused by the automobile will become practically negligible, at least in comparison with what has been the case the last few years.

## UNIVERSITY OF MANITOBA

### WINNIPEG

Offers, among others, the following Courses:

Through its FACULTY OF ARTS AND SCIENCE, the University of Manitoba offers the following degrees: B.A. and B.Sc. including the (Thesis) and Honors. Through its FACULTY OF ENGINEERING AND ARCHITECTURE, the University of Manitoba offers the following degrees: B.E., B.Sc. (E.E.), M.Sc., and Ph.D. Through its FACULTY OF MEDICINE, the University of Manitoba offers the following degrees: M.D. and C.M. Through its FACULTY OF AGRICULTURE AND HORTICULTURE, the University of Manitoba offers the following degrees: B.S.A. and B.Sc. (H.F.). Through its FACULTY OF LAW, the University of Manitoba offers the following degrees: LL.B. For names of admission, details of courses and other information, apply to W. J. SPENCE, Registrar, University of Manitoba, Winnipeg.

## SPECTACLES On 30 Days Trial

Non-Breakable Clear Vision

Will give you a younger and yet more distinguished appearance. Built for Strength, Comfort, Beauty. Laid on a rubber base, easily polished nose bridge and gracefully curved temples. No solder, no glue, no metal under the eyes. A work of beauty and a delight for the wear.

# Irish Free State Making Progress As A Member Of The British Commonwealth

The only tangible bond linking together the members of the British Commonwealth of Nations since the Imperial Conference of last November is the British crown, or the person of the King, but Ireland has other interests, important among them her economic status, which bind her to Britain and the Commonwealth.

Timothy A. Smiddy, minister of the Irish Free State to the United States, said in a public address at the University of Chicago, Mr. Smiddy delivered one of the Norman Wall Harries lectures on the general subject of the British Empire.

"We have co-operation and no coercion, and the bonds which bind the various nations are intangible," the Irish minister said. "Whether these symbols signifying membership in an association of free nations are bonds which attach or bonds which chafe, is to be determined by future experience. Since the establishment of the Anglo-Irish treaty we have been free to work out our national life in our own way without help or hindrance from any outside source whatever."

"Nature has placed Ireland and Great Britain in close contiguity with each other, which geographical contiguity begets for Ireland a relationship to Great Britain more intimate than that of any other member of the Commonwealth. This relationship is exemplified economically by the market for Irish commodities. For instance, 98 per cent. of the exports of the Irish Free State are consigned to Great Britain and Northern Ireland, and 85 per cent. of the imports of the Irish Free State are from Great Britain."

Speaking of the progress that has been made by the Irish Free State as an autonomous member of the Empire, Mr. Smiddy said: "If one of the tests of self-government is ability to insure stability, and to lay the foundations for an economic and cultural development that will create for the average citizen the opportunities for a full life, the people of the Irish Free State have already during the last five years amply justified their claim to be allowed to govern themselves."

## Stubble Burning

Found to Be An Expensive Operation Under Best of Conditions

Burning of stubble has been found to be of some value in the destruction of weeds by destroying the seed plants with their seed crops before they have entered the soil. Burning stubble is, however, an expensive operation even when the latest type of oil burners is used. Tests at the Swift Current Experimental Station showed that a running fire started with an oil burner can sometimes be obtained, making the acre-cost of burning very low, but a fire of this kind can be obtained only in dry stubble, which usually contains few weeds. Weedy stubble, it is observed, is almost always short and thin and will not carry a continuous fire, which is necessary if the weeds are to be destroyed.

The 1926 report of the Swift Current Experimental Station, which can be obtained from the Publications Branch of the Department of Agriculture, Ottawa, gives illustrations of stubble burners at work. The machine is drawn behind a rack from which straw is fed into a wide firebox. The firebox is made of sheet iron and is equipped with parallel grate-bars which slide over the stubble. A small gas engine is belted to a fan supplying a draft of air which blows the fire into the stubble. A 14-foot machine of this kind will burn from 2 to 3 acres an hour. Three men and four horses are required to keep it going. From 40 to 60 cents per acre was found to be the cost of the labor of men and horses, while the gasoline cost 3 cents an acre.

Further trials of this machine are to be made before the Station is prepared to make any recommendations with respect to its efficiency.

A Scotsman paid his taxi fare and gave the driver a penny for a tip.

"What's that?" growled the driver, holding the penny and glaring at it in disgust.

"Ye're a sportsman," said the Scotsman, beaming at him. "Taxis!"

That properties peculiar to X-ray may be contained in the light emitted by glow-worms, is the opinion of some scientists.

Parkes—"So your wife decided to 'leave to drive, too.'"

Sparkes—"Yes, she won't stop at anything."

W. N. U. 1288

## Rapid-Growing Tree Has Been Developed

Reaches Height of Sixty Feet in Thirteen Years

The voluminous daily newspaper condemned to die for the slaughter of wood-pulp forests, has been revived by the development of a tree that will grow to a height of 60 feet and a thickness of 18 inches in 13 years, says the New York Evening Post.

This tree, a hybrid poplar, has been developed by Dr. Ralph McKee of Columbia University and Dr. A. B. Stout of New York. The work was backed by the Oxford Paper Company of Ramford, Maine. The hybridization was carried out at Highland Park, Rochester, N.Y., and the Agricultural Experiment Station at Geneva, N.Y.

The world is now consuming wood pulp four times as fast as it grows in the forests. The new tree, however, will remove wood pulp production from the category of forestry to that of agriculture, and permit the growing of the tree in regular crops as rapidly as they are needed. The first crop, it is promised, may be harvested within ten years, to thin out rapidly growing forests.

The paper obtained from poplar pulpwood, said Dr. McKee, is superior to that now generally obtained from spruce. The new trees can be propagated from seedlings.

## Horses Return to Birthplace

Teams Passed Up Two Later Homes on Journey

A year after P. H. Ashby, an Edmonton Alberta farmer, bought a pair of mares, he missed his team one morning. The mares were found on a farm fifty miles away. Its owner said they had strayed there but acted at home on the place.

Later it was learned the mares had been coon on the farm to which they had strayed and twice had been sold before Ashby got them, but had passed up their two previous homes. Their route back to their place of birth was through woods and open country they had never seen before. Animals have a sixth sense.

## Winnipeg Newspaper Union

## Stimulus of Nitrate Counteracts Drought

Top Dressing of Fertilizers Keeps Up Pasture in Mid-Summer

Top-dressing of pastures and meadows as a stimulus to growth during the summer months, is a practice followed by farmers in Britain and Europe that might find a wider application in Canada than it does at the present time. Midsummer droughts of considerable duration are not at all uncommon, and it should be worth while to provide the extra stimulus in the form of fertilizer, to counteract this. For top-dressing a quick-acting fertilizer is essential and applications of nitrate of soda, at the rate of from 100 to 150 pounds per acre, given in two or three applications, have filled this need admirably. In tests carried out on pasture plots at the Fredericton, N.B., Experimental Station, in 1925, the plots that received 200 pounds of nitrate per acre averaged 4,653 pounds of clipped grass on a per acre basis; the plots that received 100 pounds of nitrate yielded 4,509 pounds of grass and the unfertilized pasture plot yielded only 3,207 pounds. This was an increase of 1,746 pounds in the one case, and 1,393 pounds in the other. It was noticed that in the fertilized plots the grass was thick and of a dark green color, and that weeds were not plentiful. In the unfertilized pasture, on the other hand, conditions were just the reverse.

Applications of nitrate in the early summer—applied preferably just before a rain—should be effective in giving well-cropped pastures a new lease of life that should carry them over the droughty midsummer period.

## Has Won Many Prizes

Largest Pig in World Weighs Over Half a Ton

Billy, the world's largest pig, is on view at an agricultural show in Johannesburg, and is insured for \$25,000. He is 8 ft. 3 inches long, 6 ft. 9 inches in girth, and weighs just over half a ton.

Billy has travelled 35,000 miles and is just back from a visit to Australia. He has a voracious appetite, and every day consumes four cases of apples, eight or nine buckets of milk, two bushels of bran, 10 or 12 cabbages and a few "odds and ends."

Billy, who has won prizes innumerable, has a valet specially appointed to keep him groomed, to reserve accommodation in train and boat when he travels. His food alone costs \$10 a day.

Billy's owner has decided to send him to the British Museum after his death.

The mammoth pig is only 28 months old, and a long and prosperous career still lies before him.

Egg Shell Not Fragile

An egg shell may be thin, but it is not fragile. An egg placed beneath the giant testing machine at the Bureau of Standards, Washington, without a pressure of 63 pounds before it was crushed. Two hundred tons was required to demolish a foot-square piece of timber.

Detective—"Ah, we have a new cook."

Wife—"How could you tell?"

Detective—"I observed strange finger prints on the pickles."

All snake venom is not alike. Some poison the blood and some cause paralysis of the diaphragm.

## Saskatchewan Livestock Sales

Cattle Breeders' Association Hold Successful Sales at Prince Albert and Saskatoon

The Saskatchewan Cattle Breeders' Association sales which were held at Prince Albert on June 7 and 9, respectively, proved to be quite successful. In all sixty-five head of pure bred stock were sold. The quality of the stock offered was good with the exception of a few individuals that did not sell. There was possibly too high a percentage of junior yearling bulls to obtain a very high average.

The Prince Albert sale, which was held on June 7, had an average of \$119.30. In the Shorthorn classes the junior yearling and grand champion Shorthorn bull, which was contributed by the Saskatchewan Institutional farms, Prince Albert, sold to J. T. Coombs, Pleasant Valley, for \$170. The senior champion bull was contributed by R. J. Huxtable and sold to G. W. Grisby, of Tisdale.

In the Aberdeen Angus classes the junior and grand champion bull was contributed by Wm. D. Lyon, of Devon, and was purchased by J. G. Robertson, of the department of agriculture, Regina.

The grand champion Hereford was bred by T. A. Clark, of Lake Valley, and was a real good individual. The Saskatoon sale proved to be more successful than the Prince Albert sale. In that the general average was \$128.65.

The sale was handled by J. V. Durno, of Calgary, and the judges were John Dracott, of Edmonton, and W. D. Lyon, of Devon.

Thirty-one Shorthorn bulls changed hands at an average price of \$137. The junior and grand champion was contributed by the University of Saskatchewan, Saskatoon, and sold to John Gordon, Richard, for \$215. The top price of the sale was received for the first prize senior yearling Shorthorn bull and was sold to the department of Indian Affairs for \$235.

The grand champion Aberdeen Angus bull was contributed by C. R. Wade, of Asquith, and was purchased by the livestock branch, Regina, while the grand champion Hereford bull was purchased by the department of Indian Affairs, Regina.

In the Holstein classes the aged bull, Strathmore Sir Donald Fairchild, contributed by John H. Clark, of Netherhill, was awarded the grand championship, and was sold to F. Walters, of Moose Jaw, for \$150.

The heaviest buyers at these sales was the livestock branch of the department of agriculture, and Mr. Christman, of the department of Indian Affairs, Regina.

Hard on the Cook

New Cook: I can't get the dinner the way you told me to, ma'am.

Missus: Why not?

New Cook: Didn't you tell me to have most beef and gravy?

Missus: Yes, that's what I ordered.

New Cook: Well, the butcher sent up the beef but he didn't send a drop of gravy.

Mr. Hensley—"Today is your birthday, dear, and I have a surprise for you. Can you guess what it is?"

Mr. Hensley—"I'm already surprised. That is the first time in ten years that you remembered it."

"Dust" from a blast furnace at an automobile manufacturing plant has been found to contain fifty per cent. iron, which is being reclaimed.

# National Research Laboratories Will Assist In Applying Science To Industry In Canada

## Canada Leading In Export of Wheat

Will Be Greater This Year Opinion of French Expert

Louis Louis-Dreyfus, a French banker and grain merchant, who is one of the leading authorities on wheat, recently gave an address to the French-American committee in Paris in which he declared that Canada was the greatest wheat-exporting country in the world, that the grain from the Dominion had no equal in quality except some of the Russian cereal, and that supplies available from Canada would continue to increase.

With established agencies in all wheat-producing countries in the world, including an agency at Vancouver, which he personally visited last year, Mr. Dreyfus predicted that the exports of wheat from the United States, Canada and Argentina would increase to 18,000,000 tons in 1927, against 14,000,000 tons in 1926. Of this total he put the shipments from the United States at 6,000,000 tons, those from Canada at 8,000,000, and those from Argentina at 4,000,000. He termed these super-producing countries—countries that produced more than they could consume.

He expressed the belief that France eventually would produce enough wheat to supply the demands of its people, but some time hence.

## Cost of Operating a "Combine"

Combined Reaper and Thresher Effects Considerable Saving

In a normal season the combined reaper-thresher will cut and thresh wheat, oats, barley, fall rye and flax at a considerable saving over the binder and separator. Investigations have been made on this point at the Swift Current Experimental Station and the results are detailed in a Dominion Department of Agriculture pamphlet entitled "The Combined Reaper-Thresher in Western Canada."

It was found that a sixteen-foot combine drawn by 12 horses will cut about 25 acres in a 10 hour day. Drawn by a tractor it cuts about 44 acres in the same time.

In the case of such a combine drawn by 12 horses and operating 20 days the cost per acre was \$1.80 or 9 cents a bushel on a 20 bushel per acre crop. In similar circumstances the cost of a tractor drawn machine was \$1.64 per acre and 8 cents per bushel. Compared with this harvesting with binder and separator cost 17 cents per bushel.

Community Hotels

Moore Jaw Leithbridge have embarked on what is called a "community hotel" project, the idea being to raise by stock subscriptions from citizens funds sufficient to build and equip good, thoroughly up-to-date hotels in these cities. The company which looks after the selling of stock first assures itself that there is room for such hotel or hotels.

So many shillings are put into London gas meters that a coin shortage often exists until meters can be cleared and the coins put into circulation again.

The announcement from Ottawa of plans for the extension of scientific and industrial research will be welcome news to the business interests of the country. Canada has lagged far behind other nations in this work. In agricultural research great progress has been made. What has been accomplished has been worth millions of dollars to the country. But while other countries have added vast industrial wealth through research we have neglected to take advantage of opportunities which lie at hand, although Canadian industrial leaders have been keenly alive to the need and have urged Government action repeatedly.

According to the announcement, on a per capita basis, the appropriation made for this extension will place the Dominion on practical equality with other countries. The United States, Germany and Great Britain are spending sums yearly in applying science to industry and in standardization, thus securing the twofold advantage of eliminating waste and developing new processes which open fields for business hitherto unheard of. The expenditures have paid for themselves many times, just as the money spent here in developing new strains of wheat have returned fortunes. What is ahead in the reaping of harvests from our natural resources if this work is conducted along the proper lines maybe imagined.

The establishment of national research laboratories available for the use of individual firms will open prospects which enterprising concerns will readily see. Large manufacturing concerns will be able to install their own laboratories, but in Canada in particular are many not financially able to do this, but who nevertheless would welcome facilities for experimentation. These the Government will now provide, and interested firms will gain the benefit at small cost.

Not the least advantage will be in the premium which is thus to be placed on initiative and enterprise. Business interests alert enough to take advantage of this opportunity will probably forge ahead of their less aggressive competitors. There will be a search for new ideas and methods, while those satisfied with the routine of the past will lose out.

It is said that one of the objects of the visit in England of Hon. James Macdonald is to study British methods of research. He will there have the benefit of years of experience. It is gratifying to learn that Canada is at last to fall in line with this progressive movement.—Moose Jaw Times.

## Is Largest Contributor

Michigan Supplies More Settlers for Western Canada Than Any Other State

The state of Michigan is apparently supplying more settlers for Western Canada than any other state in the union, according to figures submitted by Fred W. Leitch, Dominion immigration agent at Detroit, who has been in the west gaining first hand information of agricultural conditions here.

Many farmers have come from that state this year, he says. Last year, according to returns made public by U.S. authorities, Michigan sent 2,867 of the total of 21,025 farmers who left the States to take up land in Canada.

## Develop Gold Claims

Thirty Placer Gold Claims to Be Developed in Saskatchewan

Development of 30 placer gold claims in the Waterhen Lake district of Saskatchewan is proposed by Edward Tisdale, Canadian-born prospector, and H. G. Tucker, both of Chicago, now en route to the northern hinterland. Hon. T. C. Davies, Saskatchewan Minister of Labor and Industries, arranged for Walter Hastings, Provincial Geologist, and Professor Worcester, of the University of Saskatchewan, to join the expedition. Dr. Cameron, Edmonton geologist, will also join the party.

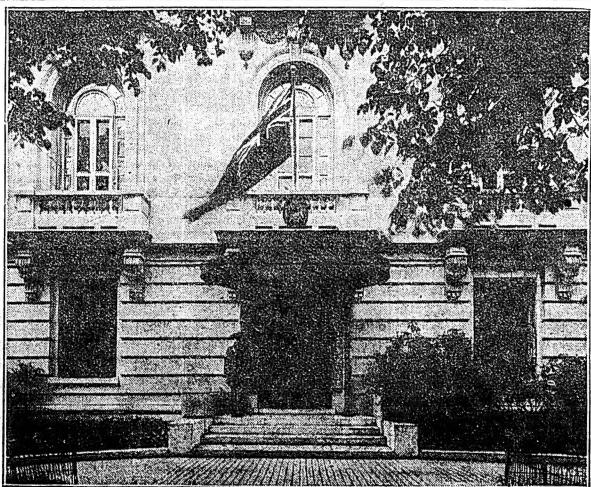

Minister: I hear, Paddy, they've gone dry in the village where your brother lives.

Paddy: Dry, mon; They're parched. I just had a letter from Mike and the postage stamp was stuck on with a pin.

Dave—"What is the term applied to one who signs another person's name to a cheque?"

Ted—"Oh, ten to twenty years."

A writer suggests that most badly-headed men have timid natures. Only the brave preserve the hair.

CANADA IN WASHINGTON  
Home of the Dominion to the United States, Hon. Vincent Massey. The opening of the legation is one of the marks of Canada's progress in the Jubilee year of Confederation.

WORLD HAPPENINGS  
BRIEFLY TOLD

The Duke and Duchess of York received a warm welcome home upon their arrival at Portsmouth, June 27, after their six months visit to Australia.

The Council of the League of Nations decided to invite the United States to the League's third international transit conference at Geneva, Aug. 24.

Three persons were killed when an aeroplane fell 3,000 feet in the outskirts of Winner, S.D. in an effort to rescue the hearing and speech of a deaf mute.

Canadian employment conditions at the beginning of June showed a more favorable aspect than in any other month since 1920. Approximately 43,896 more workers were employed on June 1 than on May 1.

Twenty so-called Kipling noblemen have been arrested and banished and their property including some 20,000 sheep, confiscated because of the former Canadian affiliations of the so-called noblemen.

Stavo Jurga has an aspirant for trans-Atlantic flight honors. The newspapers say that the aviator, Boudlascovich, is making preparations for a flight from Delgrate to New York in the near future.

The population of Ontario for the calendar year was 3,108,000, the latest vital statistics report issued by the provincial government shows. The urban population is given as 1,478,189, and the rural population is 1,629,811.

Two hundred and seven persons in the United States paid taxes on incomes of \$1,000,000 and over for the calendar year of 1920. Approximately 75 in 1924 and 205 in 1916, the previous high mark.

Hon. Rodolphe Lemieux, Speaker of the Canadian House of Commons, was unanimously elected by the Paris Academy of Moral and Political Science, as the foreign member of the academy in place of the late Cardinal Mercier of Malines, Belgium.

Dairy men from the four western provinces will gather in Regina for the western Canada dairy convention to be held Feb. 7-10, 1925. The board of directors of the Saskatchewan Dairy Association decided on this at its meeting held recently.

## Gift for Lady Willingdon

Winnipeg General Hospital Presenting Model of Spanish Ship  
Directors of the Winnipeg General Hospital and members of the Provincial Government are making a presentation to Viscountess Willingdon of a silhouette model of a 15th century Spanish caravel. The work on the model has been done by the occupational department of the Winnipeg Psychopathic Hospital, under the supervision of Miss J. M. Stewart, Viscountess Willingdon, on the occasion of her recent visit to the city, remarked on the efficient workmanship on the model, which is a replica of a famous ship "El Rayo del Sol." As a token of regard and as a memento of her first visit to the city the government and hospital board decided to make the presentation.

## Honor Two Canadians

Alaskan Peaks Named After Fawcett and Simpson

The naming of two mountains on the British Columbia-Alaska boundary in honor of two Canadians has been officially recognized by the United States Geographic Board in a recent decision.

After the late Thomas Fawcett, D.T.S., Canadian senator, a mount on the international boundary between British Columbia and Southeastern Alaska has been named Mount Fawcett. It is 16 miles southeast of the elbow of Sitkine River.

In honor of Willibert Simpson, member of the Canadian senate, international boundary commission, a mount 6,752 feet high has been named Mount Willibert. It is 12 miles southeast of the Unuk River.

## Both Were Mistaken

Playing over an Irish lichen, a cleric once lost his ball and accused his caddie of having stolen it.

When a moment later it was found the golfer began an apology.

"Arrah, silver mind at all, at all," said the boy. "You thought Ol was a thalfe and Ol thought you was a gintlemin, an' begorrah, we both made a mistake."

In 1921, more ships passed through the Panama Canal than at any time since its opening. There were 5,230 during that year.

Justice may be blind, but she has a good memory.

W. N. C. 1658

## Will Tour Canada

Delegates to World's Poultry Congress to See Dominion

Delegates from forty nations attending the World's Poultry Congress in Ottawa, July 27 to August 4, will make a tour of Canada from coast to coast immediately following the Congress, preliminary announcement of the tour being made from the World's Poultry Congress office at Ottawa. The tour will be made by special train leaving Ottawa on August 4 and covering first Quebec and the Maritime provinces as far east as Halifax, Nova Scotia. The special train will then tour Western Canada, making stops at Winnipeg, Brandon, Regina, Moose Jaw, Saskatoon, Edmonton, Calgary, at a number of famous beauty spots in the Rocky Mountains, at Vancouver and Victoria and other points en route. Upon their return East the delegates will visit Niagara Falls, and the party will disembark at the Canadian National Exhibition at Toronto, on August 31. This tour of approximately eight thousand miles, which has been arranged through the co-operation of Canadian Government Departments and the Canadian Railways, will afford prominent visitors from many lands an opportunity to gain an impression of Canada's extent and resources which would not have been possible had their visit been confined to the World's Poultry Congress in Ottawa. About three thousand delegates from the United States are expected to attend the Congress, a number of whom will be included in the party making the tour of Canada.

## Britain Must Guide Egypt

Empire's Highways Depend on Suez Canal Says Hurst

"Since Egypt must be guided in government by a foreign nation, we must be that foreign nation," declared Sir Cecil Hurst, legal adviser to the British ministry of foreign affairs in an address before the English-speaking union and the Chicago council of foreign affairs at Chicago.

"Because the Suez Canal is the approach to our Australian Dominions and the Far East," Sir Cecil added, "through Egypt go the highways, arteries and living veins of British life and we must control them."

Winnipeg Newspaper Union

A Dainty Frock

This charming frock is suitable for many occasions. The skirt is shirred to the bodice having tucks at each shoulder, a becoming round collar and short sleeves. In view A the frock is made of plain material and is effectively trimmed with braid or insertion, while view B is fashioned of figured voile and has the trimming omitted. No. 1560 is in sizes 6, 8, 10 and 12 years. Size 8 requires 2 yards 36-inch material, or 1 1/2 yards 44-inch, and 7 yards trimming for view A. Price 20 cents the pattern.

Home sewing brings new clothes within the reach of all, and to follow the mode is delightful when it can be done so easily and economically by following the styles pictured in our new Fashion Book. A chart accompanying each pattern shows the material as it appears when cut out. Every detail is explained so that the inexperienced sewer can make without difficulty an attractive dress. Price of the book 10 cents the copy.

G. A. CUNLIFFE

Superintendent Canadian National Railway, Brandon, who retired from active service July 1.

## Miracles in Crime Detection

Seattle Criminologist Thrills Delegates to Convention of Chief Constables Association

Crime, its deep rooted causes in human nature and social conditions, and the mechanism of its detection, its punishment and cure, the handling of the convicted criminal, the development, training and administration of the police officers who have those problems daily before them—all of these problems came within the scope of the deliberations of the Chief Constables Association of Canada during their annual convention.

Luke May, Seattle criminologist, and president of the North West Association of Sheriffs and Police, thrilled the case hardened veterans of police departments from every province of the Dominion with his absorbing account of the miracles of the laboratory in crime detection. From close as a dropped needle, a shred of fabric caught on a window sill, the measurement of the ticks on the blade of a knife, the identification of a strand of hair, a finger print located on the inner workings of a pistol.

Development of scientific methods of crime detection and co-ordination of all law enforcement agencies through central state and provincial bureaus was his message. It was due to such co-operation as found in Canada that Nelson, the suspected stranger, had been apprehended. "It was the sorriest day of his life that he chose to commit a crime in this Dominion," declared Mr. May.

## Advanced Legislation

Saskatchewan Pure Breed Sire Act to Be of Great Benefit

The Saskatchewan Pure Breed Sire Act, which came into effect on May 1, is the most advanced legislation for the elimination of scrub sires passed by any province in the Dominion, and closely resembles the Irish Live Stock Breeders' act. It is expected that the passing of this act will have a far reaching effect on the improvement of the quality of live stock in the province. A number of petitions have already been received from rural municipalities requesting to be included in the pure bred sire area.

## Coffee and Spice Trade

There are 20 establishments with a capital investment of \$55,428 engaged in the coffee and spice industry of Canada, according to a recent report of the Dominion Bureau of Statistics. These have a gross annual production value of \$14,469,000, in which the value added by manufacturers is \$3,012,770. Imports of commodities under this heading have a value of \$6,741,001, and the only item of export is coffee and imitations which run to \$18,065 annually.

## Biscuit Factory for Calgary

The Independent Biscuit Company will erect a factory in Calgary, Alberta, this summer and will have it in operation by September, employing 100 hands. The company is capitalized at \$250,000.

In Buffalo National Park, Alberta—The end of a duel between two male deer. Their antlers became entangled, holding them firmly, and the wardens had to rope them before they could be released.

## SUNDAY SCHOOL LESSON

JULY 10

SAMUEL'S FAREWELL

Golden Text: "Thy loving kindness is before mine eyes; And I have walked in thy truth." Psalm 26:3.

Lesson: 1 Samuel 12

Devotional Reading: Psalm 26:1-8.

## Explanations and Comments.

1. "I Have Fought a Good Fight," verses 1-5.—In a solemn address in which he reviewed his office as judge, though retaining that of prophet, Samuel stood before his people and announced that he had done their bidding in giving them a king. "And now, behold, the king walketh before you; and I am old and grayheaded; and, behold, my sons are with you." Various explanations may be given for this remark about his sons; by mentioning his age and his sons he referred to the reasons given by the people for demanding a king (1 Sam. 8.5); the sons were mature men and they proved that their father was of advanced age; he was about to abdicate his position as judge, and he bespoke their kind treatment for his sons who had been his assistants. "And I have walked before you from my youth up to this day." See 1 Sam. 2:18, when his service first began. Hadden suggests that his thought here was: The king you will find out later, but me you have known well for a long time. Then Samuel put himself on trial and asked them to witness before Jehovah and Saul, as witnesses, as judges, as to whether he had oppressed, or of whom he had taken a bribe. "Whose ox or whose ass have I taken?" is his question. These were the most valued possessions of the people, who were farmers and shepherds. "Of whose hand have I taken ransom to blind mine eyes there with?" The ransom was the money offered him as judge to induce him to acquit a murderer.

Compare Paul's assertions of blamelessness in his farewell address to the Ephesian elders at Acts 20:17-27. The people emphatically testified that Samuel's record was stainless, and he reminded them that God was their witness.

"Who shall ascend into the hill of Jehovah, and who shall stand in His holy place?"

He that hath clean hands, and a true heart; Who hath not lifted up his soul unto falsehood, And hath not sworn deceitfully."

## Is Still a Problem

Getting Prince of Wales Married Seems Hopeless Task

After one of the most active years in his life in which Edward Albert Christian George Andrew Patrick David Windsor, Prince of Wales and heir to the British throne, has been "engaged" or "married" more than any year since he was born, he still remains single.

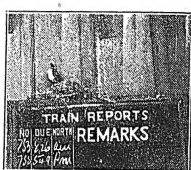

Ever since 1911, when the Prince was 17, trying to marry him off has been a favorite sport. It was at that time that his marriage to Princess Victoria Louise of Prussia was mooted. The fact that the Kaiser and Kaiserin were then visiting Buckingham Palace probably gave rise to the report. Next, Grand Duchess Olga, daughter of the Czar of Russia, became the candidate—probably based on the fact that the Prince and the Grand Duchess played off together as children.

The prince now often laughs at his former "tea-cup betrothals" as much as he does at all of the latest ones that are heaped upon him.

The feeling is growing in England that the Prince will ultimately turn to the strong solid stock of his own country for a wife. This type of marriage by the Prince would be the most popular he could make, for the people of England look upon him as an excellent type of young Englishman and they would like their future queen to be just as typically English.

Large Elevator in the World

The United Grain Growers' grain elevator now under construction at Port Arthur, Lake Superior, will have a storage capacity of 5,500,000 bushels and will cost \$2,600,000. It is to be completed and ready for operation next February. It is said this will be the largest single working elevator in the world constructed in one unit. The site has a frontage of 600 feet on the lake, and a dock 1,000 feet long will be built to accommodate ships.

## Robin Redbreast and the C.P.R.

This bird evidently likes railways, for he has built his nest on the top of the C.P.R. Train Bulletin Board at Meadowdale station, a small village about twelve miles from Toronto. It is easily within reach of any passing traveller and not more than ten feet from passing trains, but Robin knows his house is not going to be molested and when his brood is reared there will be another family that will feel that Canadian Pacific is synonymous with safety and good treatment.

## Settlers Brought Along Much Money

Those Reaching Winnipeg This Spring Had Million Dollars Says W. D. Robb

"One of the striking features about settlement which has taken place in the west during the spring of this year has been the amount of capital brought by newcomers," stated W. D. Robb, vice-president in charge of colonization of the Canadian National Railways who, with Dr. W. J. Black, director of that branch of the company's affairs, arrived in Winnipeg from Montreal on June 23rd. "Two months ago," said Mr. Robb, "it was estimated that more than a million dollars in ready cash had been in the hands of settlers reaching Winnipeg and that amount has necessarily been increased by those arriving since. These people will all be most valuable assets in the development of the country and in time will become useful and prosperous citizens."

Mr. Robb pointed out that the efforts of the organization had been directed upon family settlement work to a considerable degree and that this year it had been successful in securing both from the old land and the United States, some of the finest type of settlers ever brought to Canada. He stated that the Canadian National Railways had been able to bring in a greatly increased number of land settlers from Denmark, Holland as well as from Britain and the States. The number from Denmark alone had increased nearly three times over that of last year, he said.

Attention was drawn by Mr. Robb to the new undertaking upon which the Canadian National Railways are embarking this year, the development of markets abroad for the produce of the farm. To stimulate this and to interest the farmers directly in this phase of agriculture, he stated the company is organizing marketing tours to Europe, the first to leave next January. These are being provided at a minimum cost and the farmers will be under the direction of an expert marketing guide.

The introduction of new capital to Canada is also receiving the attention of his organization, Mr. Robb declared, and a department of natural resources has been opened in London under the charge of a thoroughly competent Canadian.

Speaking of recent complaints that more people are being brought into the country than can readily be absorbed in farm employment, Mr. Robb said:

"I can, of course, speak only for the Canadian National Railways, as far as our colonization department is concerned, no such situation exists. Not only have we been able to absorb all the settlers we have brought in, but we actually have on file in our Saskatchewan office at the present moment one hundred and fifty more requests for farm labor than we are in a position to fill. Our other agencies throughout the west are also capable of handling more people to the satisfaction of the settlers themselves."

## Canada's Future Assured

Hon. W. R. Motherwell, Canadian minister of agriculture, in a recent address stated that "Canada is now ready and able to be mindful of the injunction to count her blessings instead of relieving any disadvantages from the fact of her smallness, her isolation, her lack of coal, her lack of iron, and she is now looking for the optimistic viewpoint, finding it and forging ahead for the greater development of the country and the realization of its natural resources."

Fish prefer dark or shady sections of water because the ultra-violet rays of the sun are harmful to them. All other creatures, however, are benefited by the rays.

A system of communication by eye-lid talking to bank criminals has been used by detectives in Canada.

## Will Revolutionize Telegraph System

Exact Facsimile of Messages Possible by New Wireless Discovery

Recent experiments by G. M. Wright, research worker of the Marconi Company, have brought appreciably nearer the day when messages will be sent by wireless and copied in exact facsimile of the whole message instead of dots and dashes, letter by letter, at present.

The process is an adaptation of that by which wireless photographs are being transmitted, and by this method it will be possible for whole pages of newspapers to be filed in one end of the line and received in the form of facsimile photographs at the other end.

Under Mr. Wright's experiments, messages of this kind have already been sent a few miles in facsimile.

"The expense of operating under this system has naturally not yet been worked out but if the cost per page of the message is not too high when, for instance, a newspaper in Montreal can photograph its whole edition page by page and telegraph it to Vancouver for reproduction there.

London newspapers could produce Canadian editions by simply wireless- ing or cabling photographs of the completed pages to a printer in Canada who by photo engraving processes could speedily reproduce the pages there.

Under this system an aeroplane observer in warlike would be able to transmit from his plane to army headquarters instantaneous pictures of enemy country and enemy activities. It is obvious that the new system will revolutionize telegraphy."

## Want Increased Annual Grant

Saskatchewan Livestock Board Approach Provincial Government

An increase of \$5,000 in the annual grant from the provincial government will be asked by the Saskatchewan Livestock Board, it was decided at a meeting held in the Legislative building, Regina, June 23. Mr. Hamilton, provincial minister of agriculture, took the matter into consideration after hearing D. T. Eldorick, manager of the Regina exhibition, and R. W. Johns, manager of the Saskatoon exhibition, speak in support of the application. The board at present receives a grant of \$10,000. In explaining the uses to which the extra \$5,000 would be put it was stated that \$1,000 would be used for the board's expenses and the remaining \$4,000 would be divided equally between Regina and Saskatoon winter fairs. The \$10,000 grant has in the past been split equally between Regina and Saskatoon winter fairs.

That the winter fairs are essential to the development of the livestock and poultry industry of the province was stated in the resolution sanctioning the request to the government which also added that the progress of the winter fairs is being handicapped by the lack of funds.

Both Mr. Eldorick and Mr. Johns, in their statements indicated that the winter fairs had been run at a loss but added that they had an important part to play in the development of the livestock industry in the province.

It was explained that the \$1,000 sought for the expenses of the board included \$500 in connection with the proposal to send a livestock judging team, consisting of five boys, to the Royal Fair at Toronto.

The various expert selection committees were appointed in connection with the Royal winter show at Toronto and the International at Chicago.

## Plan Radio Station For Hudson Straits

Will Be Installed This Summer and Is Expected To Be Permanent

This summer will witness the installation of the first radio broadcasting station on the Hudson Straits, Commander Edwards, head of the radio branch of the marine department, announced a party of radio men would be added to the air force expedition which will sail north with equipment to erect a long range station on the Straits, and this station, when erected, would establish direct connection with Ottawa to the south, Fort Simpson and the north, and to the west, and Greenland and Iceland to the east. The station, it is expected, will be permanent.

## Coal Mining in British Columbia

During the first four months of the year the coal mines of British Columbia produced \$54,236 long tons, an increase of 154,929 tons compared with the similar period of 1925.

The Corliss engine at the Philadelphia Centennial in 1876 was the largest built up to that time. It was rated at 1,400 horsepower, but now single steam turbo-generator sets develop 60,000 horsepower.

## AVIATORS LAND IN HAWAII AFTER AN EPIC FLIGHT

Wheeler Field, Island of Oahu, Hawaii.—First to make the 2,400 mile flight between San Francisco and Honolulu, the army fliers, Lieutenants Lester J. Matland and Albert Hegenberger arrived here after finishing their long flight in 25 hours and 13 minutes.

Throughout the trans-Pacific hop they had been reported seen only once, by the steamer Sonoma, when 750 miles from the California coast. The army fliers came in through sunshine that had cleared away the rain and gloom of the night that shrouded their landing place.

Thousands who had waited through the long night had begun to disperse when Matland and Hegenberger came through the haze to triumphant landing.

In their flight of approximately 2,400 miles, Matland and Hegenberger completed the longest trans-oceanic aeroplane flight ever accomplished. The landing was made on a rain soaked field. The huge plane taxed the entire length of the field. Then circling, it came back to the front of the review stand where the highest army, navy and civil authorities in the island were waiting to extend congratulations to the fliers.

The crowd, agitated by hundreds hurriedly returning to the field, went wild with joy and enthusiasm. Guns of fortresses thundered in salute as the plane stopped before the reviewing stand.

Major-General Edward M. Lewis, commander of the Hawaiian department of the army, escorted Matland and Hegenberger to the eyes of both aviators filling with tears, as he said:

"My boys, I congratulate you."

Matland said that the radio beacon on the island of Maui failed to function.

"Our compass, he said, 'is what got us here. It was not too bad that we would have been out of luck.'"

When asked whether they were tired and hungry both fliers admitted that a cold chicken sandwich would appeal to them.

"We had some coffee and sandwiches, but we could not find them, although we looked all over the island while travelling," said Matland.

Hegenberger said: "Sure we had a lot of mean weather on the trip. Indeed we had our troubles but we feel great satisfaction in having made the dash."

## Believes Strike Is Imminent

C.N.R. Employees Vote in Favor of Action Says Maguire

Montreal.—Despite the offer of the Canadian National Railways giving increases to some 18,000 employees, a strike of these workers is imminent, stated J. E. Maguire, general chairman central region, Canadian Brotherhood of Railway Employees here. Results received to date from the strike vote taken recently were overwhelmingly in favor of a strike, it was said at union headquarters.

Hungary's Wheat Crop Less

Ottawa.—According to a cablegram received from the international institute of Agriculture at Rome, the wheat crop of Hungary is 68,784,000 bushels as compared with 69,200,000 last year and 71,671,000 in 1925. The cablegram also states that Hungary's rye crop is 25,511,000 bushels against 30,615,000 in 1925, and 32,525,000 in 1925.

Authorized to Fire Salutes

Ottawa.—Edmonton has been added to the list of stations at which artillery salutes are fired on certain authorized occasions including Royal salutes on the sovereign's birthday and Dominion Day, according to an announcement by the department of National defence.

Might Impair League's Mission

Geneva, Switzerland.—Great Britain has dropped her proposal for an investigation of the proper sphere of League of Nations' activities, seeing that she feared the league would be harmed by indiscriminate acceptance of new tasks, which would obscure its high mission to maintain peace.

Canada's Trade Increase

Montreal.—Canada leads all nations in increased trade since 1913, according to statistics compiled by the National Foreign Trade Council of New York. The figures show that Canada's increase was 85 per cent, Australia coming next with 45 per cent, and the United States third with 21 per cent.

## Crops Doing Well

Favorable Crop Report Covering All Western Areas

Winnipeg.—Since the completion of seeding operations weather conditions have been entirely favorable for growth, and crops are doing well almost everywhere, according to the weekly report issued by the Agricultural Department of the Canadian Pacific Railway. Earlier sown grains are practically as far ahead as at this time last year, with the grain sown later about a week behind. A considerable percentage of the crop was put in unusually late, but with present weather conditions maintaining the rapid and healthy growth there should be no question of harvesting the crop within time this fall.

Cutworms have caused damage of a minor character at a few points, but the loss in this respect does not nearly approach the average. Hail has beaten down the crops over limited areas in a few localities in Saskatchewan and Alberta, but the grain was not sufficiently advanced to be permanently injured. The noticeable feature this year is found in the increased amount of new breaking under-taken, and the farmers are taking every advantage of the satisfactory soil moisture conditions.

## Welcome Return of Royalty

Duke and Duchess of York Are Home After Six Months' Tour

London.—The British newspapers were filled with enthusiastic welcome to the Duke and Duchess of York upon their return from their six months tour to New Zealand and Australia. In connection with the welcome are many references to the self-sacrifice of the Duchess of York in having left her infant daughter, Princess Elizabeth, for so long a period. One writer says this gives the Duchess a link of common understanding with all those other British wives and mothers whose husbands are called to visit or make homes in the remotest of the empire and who must choose between their husband and children.

## Chinese Nationalists Suffer Defeat

30,000 Casualties Reported After Four Days' Fighting

London.—A Shanghai dispatch to Exchange Telegraph says the Chinese Nationalists admit suffering the heaviest reverse of the war at Suichow, North Western Kiangsu province.

Attacked by General Sun Chuan-ping and his Shantungese the Nationalists evacuated the city after four days fighting in which they lost 30,000 men, mostly killed, and retreated 30 miles to Penglu.

## Killed in Air Crash

Flight Lieut. Anderson in Fatal Accident at High River

Calgary, Alta.—Flight Lieut. C. N. Anderson, Royal Canadian Air Force, was instantly killed when his plane crashed and burned at the High River Federal air patrol station.

The accident occurred as the flier was landing in formation, a test flight for the Jubilee Celebrations being in progress.

The wrecked ship immediately burst into flames.

Anderson was 25 years old, unmarried, and his family resides in the Brandon district.

Dr. Haanel Passes

Ottawa.—Dr. Eugene Haanel, 70 years superintendent and director of mines, died here recently, aged 86 years. He was internationally famous and held a number of degrees from Canadian and American universities.

## Retains Premiership

HON. JOHN BRACKEN, Premier of Manitoba, whose Government is returned to power.

## TWO CLASSES FOR CRUISERS URGED NOW BY BRITAIN

Geneva, Switzerland.—Great Britain proposed to the technical committee of the tripartite naval conference that the cruisers be divided into two classes, one of 10,000 tons carrying eight-inch guns and the other of 7,500 tons with six-inch guns.

The United States and Japanese delegations requested time to examine the proposal "in the light of the effect it would have on the navies of each power concerned during the life of the treaty."

Some observers have expressed fears that the tripartite naval conference has reached a critical stage because the British and United States representatives have not yet been able to come together on the question of reopening the Washington treaty.

The Japanese have announced their intention to support the British view on the question of limitation of the size and armament of battleships, consideration of which would mean re-discussion of problems thought to have been solved by the Washington treaty of 1922.

The determination of the United States delegates to restrict the conference to the scope outlined by President Coolidge's invitation to the powers remains unchanged.

## Makes Parachute Descent

Toronto Girl Drops From Aeroplane At One Thousand Feet

Hamilton, Ont.—Miss Caroline Sykes, a Toronto office clerk, made what is known to be the first parachute descent from an aeroplane by a woman in Canada here when she stepped off an aeroplane 1,000 feet up in the air and made a perfect landing on the top of a mountain. Miss Sykes had been up in an aeroplane but once before. It is likely she will be employed to repeat the stunt daily at the Canadian National Exhibition in Toronto.

Seed Company Changes Hands

Regina.—J. R. Robinson, western manager for the Steele-Briggs Seed Company, Limited, has announced the purchase by the Steele-Briggs Company of the Canadian interests of the D. M. Perry Company, Windsor, Ont. The purchase gives the Steele-Briggs Company a total calling list of 24,000 merchants, while the D. M. Perry Company will concentrate its efforts in the United States.

## UNITS OF EMPIRE AS ONE IN TIME OF COMMON PERIL

Chicago.—The British family of nations may bicker among themselves but they will meet an outside menace with a united front, Sir Cecil Hurst, legal adviser to the British foreign office, told a University of Chicago audience during the second of a course of lectures on "Problems of the British Empire."

In this lies the claim of empire to be a total unit and international though foreign powers might question the reasonableness of treating the empire as a unit in strength of the common allegiance to one king, Sir Cecil said.

"Families cannot be made by contract; they cannot be made or unmade by mere agreement of their members. The British empire has grown up together and as they become stronger, they may have become more self-contained more able to stand alone; but the ties which united them to the parent state remain intact."

British nations, Sir Cecil declared, will continue to act together in foreign affairs because the spirit of British autonomy is based on the admission that questions affecting the whole group cannot be left to one member of the group to conduct without reference to others.

Equality of status among nations, as among individuals did not necessarily mean equality of stature, wealth, or temperament. In the British Empire equality meant the absence of any power of control by one community over another. Some inequalities still exist between the powers of the British and Dominion governments but these were being swept away.

## Newspaper Men Elect Officers

Mr. Sam Wynn, Yorkton, N.W. President of Weekly Newspaper

Yamsville, Ont.—Sam Wynn, Yorkton, Sask., was elected president of the Canadian Weekly Newspapers Association at the concluding session of the annual meeting here. Other officers are: First Vice-President, S. B. Anslow, Campbellton, N.B.; Second Vice-President, Hugh Scraps, Dumfries, B.C.; Directors include: British Columbia, R. E. White, Kamloops; H. G. Parsons, Golden, Alberta; Charles Clarke, High River; A. R. Emms, Lehigh, Saskatchewan; C. R. Macintosh, M.P., North Battleford; D. C. Dunbar, Estevan.

Novel Flight Planned

London.—Mayor Moore announced that an invitation would be broadcast immediately to aviators to qualify for a non-stop flight from London, Ont., to London, England, for a prize of £25,000 to be provided by a local brewery. A machine for the flight will be purchased by the same concern and handed over to the aviator as soon as one fully qualified, preferably a Canadian, has been found to undertake the trip.

Favor Amalgamation

Vancouver, B.C.—Ratepayers of Vancouver and South Vancouver by overwhelming majorities voted in favor of amalgamation of the city and the municipalities of South Vancouver and Point Grey.

Receives Peace Prize

Oso, Norway.—Foreign Minister Stresemann of Germany has arrived here to receive the Nobel peace prize for 1925 which he shares with Foreign Minister Briand of France.

## Best Opening For Aviation In Canada

Vast Distances Make Time Saving a Distinct Need

Calgary.—This year's two successful trans-Atlantic flights have given a tremendous impetus to the development of air transportation, and commercial flying will see wide spread extension both in the United States and Canada during the next few years in the opinion of R. P. Mahoney, head of the Ryan Airlines Inc., San Diego, builders of the "Spirit of St. Louis," the monoplane in which Colonel Charles A. Lindbergh made his epoch-making flight from New York to Paris.

"Advances made in the science of flying during the past few years need only to be brought to public attention," he said, and went on to state that "transportation by air when properly conducted is at least as safe as any other means of transportation."

He attributed the slow adoption of the flying idea to the vast amount of publicity given accidents in it and the newness of the science. "An aeroplane passenger may be scratched if some accident and because of that appears in big headlines, while a railway accident in which 20 are killed is not given half the attention," he said.

"What is the greatest problem waiting to be solved by flying men today?" he was asked.

"I would say that unquestionably it is the establishment of airways, air stations, equipment for night flying and the provision of emergency landing fields," he replied. "This is up to the various towns and cities and the Governments of the Provinces of Canada, the United States and Federal Governments."

"Canada," he said, "has the biggest openings for aviation of any country in the world. It is a country where the factors of time saving and vast distances are involved and where consequently air flying can fill a distinct national need."

## Canadians All

Mr. Cartier Says Canadian Is a Title to Be Proud Of

Toronto.—After 68 years, Madeline Cartier, daughter of one of the Fathers of Confederation, Sir Georges Edouard Cartier, returned to Toronto. Toronto was her childhood home between 1854 and 1858. When the Government moved to Quebec at that time she went with her father, and until today has never seen Toronto since.

Madeline Cartier came from France as the guest of the Canadian Government to attend the celebration of the diamond jubilee of Confederation.

"One thing I do hope to see soon is the adjective 'French' dropped in French-Canadian," she said. "I think everyone should be just plain Canadian—and it is a title of which every one should be very proud."

"I'm going through to the West and I am eager to get a feather crown. My father had a wonderful head dress and he'd given him by the Indians."

## Transfer of Military Units

Several Western Units Will Change Location

Ottawa.—Re-location of a number of military units throughout Canada is announced by the department of national defence.

The Westminster Regiment, C. Company, has been transferred from Mission to New Westminster, B.C.

The Assiniboia Regiment, C. Company, has been transferred from Manor to Indian Head, Sask.

Canadian Machine Gun Corps, No. 3 Company, machine gun battalion, has been transferred from Nanaimo, B.C., to Mission, B.C.

Robbers Destroy Noted Paintings

London.—Scotland Yard detectives are investigating the \$35,000 robbery of the home of Colonel Harry Day, M.P., in which the thieves slashed four valuable paintings, one the gift of Houdini, the handkerchief king, in 1909, inscribed "To Harry Day from his sincere pal, Harry Houdini." Colonel Day said he could not imagine a motive for the vandalism.

Bill Given Second Reading

London.—Second reading was given in the house of lords to the Workmen's Compensation "Transfer of Funds" bill, under which compensation awarded beneficiaries in one part of the Empire may be transferred to the country in which they reside. The bill arose from a resolution passed by the imperial conference last year.

Increased Acreage in B.C.

Invermere, B.C.—Agricultural progress in this part of the province is attracting a good deal of attention. It is now reported that 70 acres of canning peas will be set out this season.

## GOVT. VICTORY IS NOW ASSURED IN MANITOBA

Winnipeg.—Premier John Bracken and his Progressive supporters were returned to power in the provincial general election with a clear-cut mandate to guide the political destinies of Manitoba for another five years.

Indications are for a Government victory in 29 of the 55 seats in the Legislature, or equal to its representation at dissolution.

The striking feature of the election however, was the showing of the Conservative Party, which in standard early compiled, was credited with 15 seats, a gain of nine, Liberals appeared to have lost two seats, with only three candidates declared elected and two losing, while Labor appeared to have weathered the storm with its pre-dissolution representation unimpaired. The gains were chiefly made at the expense of the Independent group, which had only elected one member and was leading in two. In the last hour the Independents had a voting strength of eight.

The electors of Manitoba appear to have registered a sweeping verdict in favor of extending the present facilities for the sale of beer. Winnipeg piled up a majority of approximately 15,000 for changes in the beer laws, and sale of beer by the glass in Government-licensed establishments likely will be the result. Proponents of the beer patrons out-voted those in favor of extending the bottle under the "cash-and-carry" system by nearly two to one. Indication that the electors want the Government to continue its control over the distribution of intoxicants was shown in the defeat of the proposal which would have given the brewers the right to deliver beer direct to permit-holders.

## Dusting Wheat Fields

Will Use Aeroplanes to Control Dust by Spraying Chemicals

Pargo, N.D.—Aeroplanes for dusting wheat fields with "cola," a chemical with which experiments are to be made in the hope that it will prevent or control black stem rust on wheat, will be used on an extensive scale in Manitoba and will be tried in a smaller way in Cass County, North Dakota. It was learned here.

T. M. Shields, officer of the Royal Canadian Flying Corps, spent Sunday here on route from Philadelphia to Winnipeg with a new aeroplane which he will use in dusting fields in Manitoba. It is planned to treat about 5,000 acres in the Canadian provinces.

Walter R. Reed, who is to make smaller experiments on his farms near Chaffee, N.D., conferred with Mr. Shields regarding the proposed Canadian experiment. Mr. Reed will have experiments made on three different kinds of wheat, dusting about 10 to 15-acre tracts of each.

## Bans Milk From Montreal

Health Commissioner of New York State Issues Strict Orders

Saratoga Springs.—Health officers throughout New York State have been directed by Dr. Matthias Nicol, Jr., state commissioner of health, to exclude from their districts all importation of milk and milk products originating in Montreal or in the vicinity of the Canadian metropolis.

In his warning, sounded at the opening session of the annual state convention of public health officers here, Dr. Nicol said that Montreal was in the grip of the greatest typhoid epidemic of modern times.

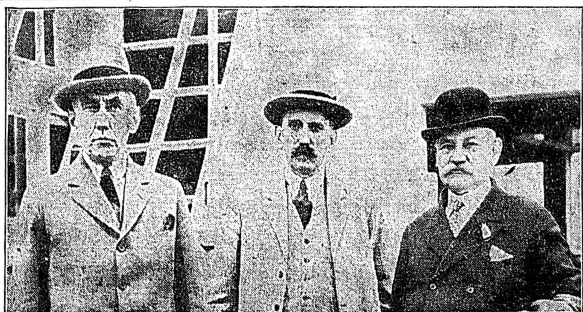

In a population of 700,000 there have been over 7,000 cases of the disease, with a death rate of eleven for each one hundred cases, or nearly 500 deaths. The disease has been an epidemic since January, he said. It was milk borne epidemic and emanated apparently from a pasteurizing plant in the city.

Ship License Cancelled

Panama Canal Company's License at Vancouver, B.C., has been ordered to cancel the Panama registry of the ship Federalship which some time ago was seized by the American prohibition authorities and later released on the order of a Federal court. The Panama action was based on the non-payment of \$115 dues to the National treasury for taxes. M. Morris reported that cancellation of the Panama registry had been solicited by the owners of the vessel.

Increase in Coal Output

Vancouver.—During the first four months of the year the coal output of British Columbia produced \$5,256 long tons, an increase of 154,929 compared with the similar period of 1925.

## Famous Explorer for Japan

Captain Roald Amundsen, famous Norwegian explorer, who has flown and sailed to the North Pole or its vicinity, is taking a trip to Japan and is here shown on board the Canadian Pacific liner Empress of Asia just before leaving for Yokohama from Vancouver, B.C. With him in the photograph are C. B. Stahlschmidt, the

## Poor Appetite

### An Asset

Prolongs Life by Preventing People From Over-eating

I have spoken of a man, seventy years of age, who was only one of several brothers in the past fifty years of age. Someone asked him what was the reason that he had out-lived his brothers. "Well," he replied, "You see I always have had a poor appetite." This was true. His brothers had really been heavy eaters, and had died of heart or kidney conditions in the very prime of life.

A writer in one of our medical journals tells us that dyspepsia is one of the real blessings of mankind, and lengthens the span of the individual's life by many years. Man was given a stomach that is really two or three times as large as is necessary.

Why? Because, naturally, man couldn't figure on three meals a day at regular hours, as can men of today. He had to go out and find or hunt his food, and when he ate, he filled his stomach to its full capacity, because he wasn't just sure when he would get his next meal. The trouble with some folks today is that they think they should eat until they have filled the stomach, and yet they know that just as sure as four or five hours pass, they will be absolutely certain of another meal, and as large a meal as they want. Nature is so good to them they seem to withstand this over-eating fairly well, but if Nature rebels then they have to abstain from large meals, or from certain articles of food. They learn to choose what agrees with them and thus avoid trouble.

This writer points out that the difference between a dyspeptic and his more fortunate brothers is just the difference between an acute or sudden poisoning, and one that is chronic or lasts a long time. The dyspeptic with acute poisoning, and jaund, learns not to eat too much and eats only what agrees with him. The individual without dyspepsia doesn't realize that he is poisoning himself because he has no acute pain, and so real damage results to blood vessels and kidneys from his over-eating.

Remember that at this time in our history there is no need to overfeed the stomach.

### Sentinels of the Past

Totem Poles in B.C. Said to Be Four Centuries Old

Many of the red cedar totem poles that now stand as sentinels of the past at half-decayed Indian villages along the British Columbia coast are more than four centuries old, in the opinion of Mr. Johnson of the Capilano Timber Company, a prominent lumberman and a student of Indian lore.

While other parts of the Indian tribes disappeared many years ago, two huge totem poles still stand at the entrance of what was once the tribal headquarters of an Indian tribe at Kyquot, Vancouver Island, Mr. Johnson says. He believes that the poles were hewn from giant trees that probably were standing in the days of old prior to the Norman invasion and conquest of Britain, for the trees must have been several centuries old when they were cut.

The poles are carved with the customary Indian designs of the period, the figures representing persons and animals and supernatural beings being heretofore associated with the totem of the family to which they were erected.

### Captain Not Always Supreme

Word Not Law When Wife Was Along Said Young Officer

One of the junior officers of a big Atlantic liner was showing an old lady over the ship. She expressed great interest in the stateroom, the cabins and saloons, and was finally taken on to the bridge. "Ah," she said, "so this is the bridge. This is where the captain stands, isn't it, and, of course, his word is law?" The young officer coughed delicately. "Well, not quite," he said; "you see, his wife is coming with us this trip."

### Extend Hydro System in Manitoba

Authority to Spend \$2,500,000 for extension to the provincial hydro electric system in the next four years has been given by the Manitoba Government. Contracts for new construction work to the value of \$1,600,000 have recently been awarded by the Manitoba Hydro-Electric Commission. Private electric power companies are also making extensions to their power plants in several parts of Manitoba.

"What do you think of evolution?" "Don't fancy the idea; it's too slow."

W. N. U. 1683

## The Armistice Car

Rich American Has Contributed Sum Toward Its Presentation

The long dining car, which served as Marshal Foch's headquarters when he was travelling from point to point during the war, and on the plain green baize table of which the Armistice was signed in a clearing in the forest near Rheims, has for the past few years stood in the courtyard of the Invalides, where it is exposed to the weather. The paint is disappearing and cracks are showing between the planks, and some anxiety is now being felt as to whether it will be possible to keep it long in its present situation.

The city of Compiegne offered to take charge of the historic relic and to place it in the clearing of Rheims, where the rails of the military railway still run, on either side of a monument commemorating the event. Funds, however, were not forthcoming. The transport of the car to Rheims presents difficulties, as when it was taken into the Invalides a pillar and part of a wall had to be removed in order to allow it to enter, and the same measures would have to be adopted to enable it to leave. Moreover, the military railway over which it travelled to Rheims has been removed, with the exception of the lines actually in the clearing.

The scheme has now again become possible through the generosity of a rich American, who has offered to contribute a sum towards the removal of the car and the construction of a shed to protect it from the weather, and the historic railway carriage may return to Rheims.

## Aid For the Blind

Effort to Improve Their Industrial Condition Should be Supported

Sympathy will be general with the blind people of Canada in their efforts to improve their industrial condition. The declaration endorsed at the close of the annual conference of the Canadian Federation of the Blind on Saturday to the effect that hundreds of sightless people throughout the Dominion are unemployed for their work in factories is one no unfeeling Canadian can contemplate with any feeling other than one of indignation that such conditions should exist. It is no obviously adding an artificial to a natural handicap, taking advantage of human disability in a sense that cannot commend itself to those who have natural sympathies with the disabled.

There is no class in human society that should command more sympathy than the blind. Nature gives them certain compensations in the form of keener development of other senses, but it is, after all, a very poor and partial substitute for the eternal deprivation of sight and all the priceless privileges it implies. When blind people equip themselves, despite their handicap, to earn their own living, the ordinary canons of fairplay should be ample to prohibit anything that suggests discrimination against them.—Montreal Star.

"Yes, I used to be in politics myself. I was dogcatcher in my town for two years, but finally lost my job."

"What was the matter—change of Mayors?"

"Nope. I finally caught the dog."

The finding of a piece of copper pipe at Giza, Egypt, it is said, is proof that plumbings of 5,000 years ago used that metal.

## First Draft of Confederation Pact

Facsimile of portion of Sir John A. Macdonald's first rough draft of the British North America Act.

*Be it therefore enacted &c*  
*It shall be lawful for Her Majesty with the advice of the Privy Council to declare, (or to authorize the Governor General of British North America to declare) by Proclamation that the said Provinces of Canada, Nova Scotia and New Brunswick upon from and after a certain day, in such Proclamation to be appointed, which day shall be within six calendar months next after the passing of this Act, shall form and be one United Dominion under the name of "The Dominion of Canada" and thenceforth the said Provinces shall constitute and be one Kingdom under the same name aforesaid upon from and after the day so appointed, as aforesaid.*

*The Executive Government of the said Dominion of Canada is and shall be vested in Her Majesty the Queen her Heirs and Successors*

## Was Ordered to Move

Prince Had to Obey When Asked to "Move Along Please"

The Prince of Wales had the unusual experience—for him—the other day of being ordered to "move along please."

He was in the House of Commons, engaged in conversation in the Division Lobby, when the House voted, forthwith the powers that be cleared the lobby of all outsiders, and among them, grinning broadly, went the heir to the throne.

His Royal Highness' sense of humor is much more highly developed than was that of his grandfather, King Edward, who did not, as is well known, see the point of any joke, practical or otherwise, which afforded himself.

It is on record that once, when Prince of Wales, he was in the Gallery of the House when an Irish member replied him and immediately protested that "strangers were present," and (as was within his right) insisted that the Gallery be cleared. The Speaker had no option but to give the order and the Prince had perforce to leave, but although he affected unconcern, he was in fact furiously angry.

A "chemical sponge" has been made to absorb food odors and gases in refrigerators and pantries.

## Proposed New Pulp Mill

Projected Industry on the Nelson River in Manitoba

A new chapter in the development of the newspaper industry in Manitoba opened the other day when an application was received by the Department of the Interior from a group of Canadian and United States capitalists for a pulpwood berth on the Nelson River of sufficient size to warrant the erection of a mill with a capacity of 400 tons of newspaper per day.

The application does not state the coverage required, but on the basis of the Manitoba Paper Company's concession, it would mean \$200,000 worth of pulpwood; an investment of \$100,000 and a payroll of upwards of 3,000 men. This is the largest newspaper development ever planned for Manitoba.

## Saskatchewan Livestock Pool

Arrangements completed by the directors of the Saskatchewan Livestock Pool at a meeting in Regina provide that Southern Saskatchewan shipments be handled at Moose Jaw and Northern shipments at Prince Albert. Since February 1, 1928 contracts have been received.

It requires six pounds of good cork to make a reliable life preserver.

## The Valuable Lemon

Many Ways in Which It Can Be Used

Place lemons that have become dry into a saucepan of hot, not boiling, water. Leave the saucepan at back of stove for about two hours. Then wipe lemons and they will be soft and full of juice. Leave until quite cold before using.

But lemons will not become dry if they are kept in a glass jar with a tight cover.

Buy lemons by the dozen. They are cheaper that way, and there are so many uses for them that it is a great help to have some on hand.

Two or three slices of lemon in a cup of hot, strong tea will cure a nervous headache.

Lemon juice and loaf sugar are good for hoarseness.

After brushing the teeth, rinse the mouth with plain water to which a dash of lemon juice has been added. It leaves a pleasing taste in the mouth.

After washing the hair, add lemon juice to the final rinse water. It leaves the hair with a nice gloss.

A dash of lemon in the water in which rice or sago is boiling helps to keep the grains separate and makes them whiter.

Tough meat may be made tender by adding lemon juice to the water in which it is boiled.

Lemon juice is an excellent flavor for sugar cookies.

Lemon juice applied to insect bites will lessen the irritation.

Freshly beaten egg added to lemonade makes a refreshing drink.

Lemon juice and rose-water or rain-water will remove tan.

Lemon is the best garnish for fish.

## Relic of Fish Creek Battle

"Dud" Shell Will Be Presented to University of Saskatchewan

Unexploded, still lying where it ended its flight 12 years ago an ancient 13-pounder shell, made in May, 1872, and fired during the Battle of Fish Creek in 1885, was found recently in a bluff a mile and a half east of the battle site.

The finder was Paraske Hryskia, of the Fish Creek district, who brought the old shell to The Star office, she said she had been strolling about her brother's farm and, passing through a little bluff noticed what seemed to be two bolts, projecting a fraction of an inch above the surface of the ground.

She dug around the projections and uncovered the shell. The shell bears the government's broad-arrow stamp, between the letters "R" and "L." It is also marked C.A.P. Below this is an "L." At another place appears the number "25" and the numbers 572.

Local artillery officers identify it as being a 13-pounder. Mrs. Hryskia will present the shell to the University of Saskatchewan museum.

## Had Made It Soft

Put had been tapping away at a large stone for a while, when his foreman came up and told the hammer from him and smashed the stone with one blow.

"How is it that I manage to break the stone and you couldn't?" he growled.

"Digger," said Pat, "I had it all softened, ready for breaking when you came up."

Run by one man, an electric shovel has been made that will take eight dump-cart loads of a bite every minute.

## Testing Prairie Fodder Crops

Clover Suffers From Winter Killing, But Alfalfa is More Hardy

The growing of some of the most desirable fodder crops continues to be somewhat of a problem on the open prairie. Winter-killing proves to be hard on the clovers although alfalfa usually comes through with fairly good stands. Sweet clover suffers more or less, although the Arctic variety reported to come through fairly well at the Scott, Saskatchewan, Experimental Station. Among the most important permanent forage crops under prairie conditions are clover, alfalfa and timothy. Of these a mixture of western ryegrass and bromegrass give the highest yield of hay, amounting to 125 tons per acre, western ryegrass yielded 1.25 tons per acre and bromegrass 1.14 tons. These are the average returns for two years. In the 1926 crop bromegrass yielded heavier than any of the others and was closely followed by sweet clover with a yield of 1.31 tons per acre, and alfalfa with 1.10 tons per acre. These two latter crops are not reported for the two-year period.

The success of any of these crops in the West depends greatly on the quantity of moisture averaged during the growing season. In dry years sowing in rows at some distance apart gives more favorable results than thicker seeding. Sweet clover when put in with ordinary grain drill in rows 6 inches apart gives a finer quality of hay.

Results from seedlings with and without nurse crops indicate that higher yields of sweet clover were realized when the seeding was done without a nurse crop. On the other hand, when both the yields of the nurse crop and sweet clover are considered the results favor seeding with a nurse crop. Both oats and barley sown at the rate of three pecks to the acre proved to be a satisfactory nurse crop for sweet clover besides giving a good yield of grain.

The Scott Station finds alfalfa somewhat unsatisfactory because of the severity of the climate. Experimental work is going on with a view of selecting the hardest strains.

The report of the Station for 1926 gives fuller information on the growing of fodders and other crops as well as the results of the experiments with live stock and poultry, copies of which may be obtained from the Publications Branch Department of Agriculture, Ottawa.

## Featuring British Goods

American Stores Bringing Them to Attention of Buyers

The following feature of British exchange will be of interest to those Canadians who are inclined to look to Washington for fiscal and trade policy.

American shopkeepers have no illusions as to where the best goods are made.

When they have anything British to offer they put it in the front of their windows and advertise it as a great attraction to purchasers.

A great American store is this year advertising British earthenware, British linoleum, and British sports goods as worth the attention of their customers. It is amusing to read in the American advertisements of "swagger" (sportsmen from London, tailored in the English style), and of "English golf-bags, made as only English experts can make them."

This helps us to understand that the widely-printed stories of American industrial superiority are by no means accurate. The fact is that America has not yet learned to make things as well as they are made in Europe, and that is why she has such heavy import duties to keep out European productions. High as the customs taxes are, however, rich Americans are glad to pay them to get British goods.

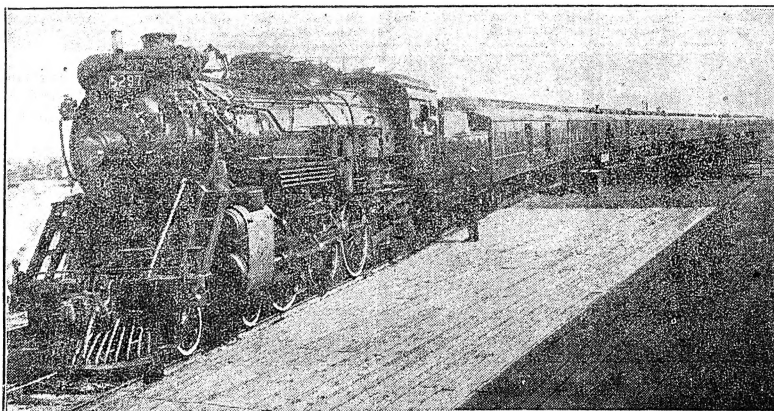

## Austrians Locate in B.C.

Fifteen Austrian families, numbering 61 persons, are to take up 2,587 acres of land in the Okanagan Valley, near Kelowna, being the first group of settlers to take up land in British Columbia under the Canada Colonization, a subsidiary of the Department of Colonization and Development, Canadian Pacific Railway. Ten additional families are to follow shortly, and possibly hundreds more if these first pioneers are as successful as there is every reason they should be.

He—"I thought the doctor told you not to eat any rich food before going to bed."

She—"Then I won't go to bed. Order me some lobster salad, please."

The wild geese, during its migrations, flies as fast as 90 miles an hour.

The photograph shows the Confederation, the new fast train of the Canadian National Railways, which went into service between Toronto and Vancouver on June 21 westbound, and June 27 eastbound. It operates via Winnipeg, Brandon, Regina, Saskatoon and Edmonton. The first westbound train carried a party of newspapermen from the prairie provinces to Vancouver and the Pacific coast newspapermen will all be represented on the return trip as far as Winnipeg.

## THE COW

Is the Best Investment a Farmer Can Make. A Good Cow, given a fair chance, Will Produce 250 Pounds of Butter Fat in Nine Months, and this at a price of 30 cents per pound, Equals \$75.00 a year. What else can you invest in that will pay you 100 per cent every year? And she gets at least half of her living out of the fence corners, stubble fields and sloughs that would otherwise be a total waste.

## Wild Animals Friendly on Banff-Windermere Highway

"The Friendly Road," by David Grayson, which is well-known to many lovers of nature, depicts incidents and friendliness of people along country roads and in the rural districts. There is, however, a road in the Canadian Rockies the friendliness of which is not due to mortals as in Grayson's book, but to the friendliness of animals. Animals termed wild, but in this instance a word that cannot be applied to those on the Banff-Windermere Highway. There is possibly no more beautiful road than this which runs from Banff to Lake Windermere, in the Columbia River Valley. The distance of 104 miles is spectacular and the scenes are constantly changing. The views from the high passes looking down into valleys, thousands of feet below, tiny lakes surrounded by al-

## CHINOOK UNITED CHURCH

Sunday School 10.30 a.m.  
Divine Worship 7.30 p.m.  
Jubilee Echoes—"Who is a Canadian Christian?"  
Rev. A. G. Gay, B.A., Pastor

The Annual Orange Church Service will be held in the Anglican Church, Cereal on Sunday, July 10, at 11 a.m. All brethren and the public are invited.

Mr D. Bell received the sad news on Tuesday of the death of his brother, Mr S. H. Bell who passed away at his home at Baldur, Manitoba.

Miss Faye Robinson, who has been teaching school in the Sunnynook district, arrived in Chinook on Saturday and will spend the summer holidays with her mother in the Rea-ville district.

Lavern Dobson, of Rockyford, is visiting his grandmother, Mrs. R. Dobson.

Miss Dorothy Smith, who is training for a nurse in the General Hospital at Calgary, arrived in Chinook on Tuesday and is spending her holidays visiting her parents, Mr. and Mrs. J. S. Smith.

Miss Hazel Ray, of Carstairs, is visiting her sister, Mrs. L. J. Cooley.

Search for the missing French aviators, Nungesser and Gali, has been resumed by two Pathe News and two New York Daily News men who arrived at the C.P.R. station in Montreal recently enroute to Chicoutimi. Three of the party will form a land expedition, while the fourth will fly into the Quebec woods from Grand'Mere. They will stay in until the mystery of the flares is cleared up.

B. Macdonnell, former Saskatoon aviator and now a leading stunt flier in Los Angeles, has written asking if the citizens of Saskatoon will provide a plane to be entered in the flight from the Pacific coast to Hawaii, which he will fly. He offers Saskatoon backers half the prize money and half any other receipts, should he be successful. The President of the Star has announced that The Star is prepared to make a substantial contribution towards the \$15,000 required. The plane would be named the "City of Saskatoon."

## Over 4 Inches of Rainfall Last Seven Days

Over four inches of rain has fallen in the Chinook district during the past seven days. This has freshened up the crops wonderfully.

The heavy rain of last Thursday was followed by another rain on Monday night which continued until about six o'clock Tuesday evening. Over two inches of rain was recorded in the last fall.

The rainfall measured by J. C. Cottrell, of Cereal, since April to date was over ten inches, and is as follows: April 1.25 inches; May 3.81 inches; June 3.03 inches July 1 to 5, 2.6 inches.

Miss Muriel Roberts left on Wednesday for Red Deer, where she will attend the Nazarene Church camp meetings.

The name of Vera Clipsham who passed Grade VI to VII with 70 marks in the recent Chinook Public School examinations, was omitted from the list of successful candidates published in last week's issue.

## Public Servants of 1867 and Children of Fathers of Confederation to be Honored

The following is an extract from a communication received from the executive committee of the national committee for the celebration of the Diamond Jubilee of Confederation: "It has been decided that the large Diamond Jubilee bronze medal be presented to all living children of the Fathers of Confederation and to any persons now living who were engaged in the public service or in connection with Parliament or any of the Legislatures of 1867."

Any person in Alberta entitled to receive this recognition should communicate with the secretary of the Provincial Diamond Jubilee Committee, Parliament Buildings, Edmonton, giving their names and addresses and a synopsis of the public service qualifying them for the honor.

## Reindeer Herd for Alberta

Raising reindeer for commercial purposes in Canada will be undertaken this year by the Dominion Reindeer Company, with headquarters at Vancouver, which has imported some 5,000 head of reindeer from Alaska. This herd will be located on the vast grazing areas between the Athabasca and Great Slave Lakes where the company has secured over three million acres for this purpose.

## Farmers Supporting Sugar Factory

Reports from the southern part of the province indicate that farmers in that section are giving strong support to the beet sugar factory at Raymond. To date some 7,000 acres of beets have been contracted to the factory and it is expected that fully 500 acres more will be included. A notable feature this season is the thorough preparation of the soil before planting, with the result that beets are making rapid growth.

## Soviet Government Buying Horses

Representatives of the Soviet Government have been in the province during the past week arranging for the selection of the horses which are to go from Alberta as part of the 4,000 head being purchased in Western Canada. This is the largest single deal of its kind since before the war. The first shipment of some 1,400 head is expected to go forward from Quebec about July 15, on a Russian boat sent over especially for this purpose.

## FOURTH FORTNIGHTLY GOVERNMENT CROP REPORT

Crops throughout the province have made good progress during the past two weeks, and reports reaching the Department of Agriculture indicate that conditions generally are very satisfactory. Much early sown wheat is in the shot blade and heads are showing in many fields where seeding was completed at an early date. Spring and fall rye are fully headed out and oats and barley are making rapid growth.

Damage from pests is lighter this year than usual. Wireworms have made their appearance in a number of districts, but vigorous growth has carried the crop past the stage where it can be seriously injured. Hail in a few districts has done some damage but this is purely local in character.

In the southern part of the province ideal growing weather is reported, early winter wheat is heading out, and a start has been made with the first cutting of alfalfa on many farms. While rainfall generally has been sufficient to carry the crops along, water is being applied over parts of the irrigation belt. Alfalfa, clovers, hay crops and prairie pastures have made splendid growth and livestock is in splendid condition.

Warm showery weather throughout the central part of the province has carried crops along well; conditions are ideal for the breaking of much new land, and summerfallowing is from fifty to sixty per cent completed. Throughout this area and in more northerly sections there is evidence of a marked in-

crease in acreage in many districts as compared with previous years.

In the Peace River and Grande Prairie districts, rainfall has been abundant and prospects generally are excellent. Seeding in this part of the province was completed earlier and crops at present are from a week to ten days ahead of those further south. A great deal of new land throughout this part of the province is being cleared and broken in preparation for the 1928 crop.

Conditions generally throughout the province are regarded as better than at this season for a number of years and with favorable weather throughout the remainder of the growing and filling period, prospects for a better than average crop are very promising.

## Streams Stocked With Fish

Brown trout fry to the number of 185,000 have been placed during the past week in the North and South Raven Rivers and Prairie, Alford and Muskeg Creeks which are tributaries of the Red Deer and Saskatchewan Rivers, West of Red Deer. The distribution was handled by Fisheries Inspector Martin of Banff.

## Military Headquarter Re-located

The headquarters of the North Alberta regiment and of A. Company will in future be located at Ponoka instead of at Killam and Camrose respectively, according to a recent announcement made by the Department of National Defence, Ottawa.

Chinook and District Agricultural Fair Friday, August 5.
